PREMIUM

- 95%+ coverage
- OEM style vane configurations maximize heat dissipation which speeds up the cooling process, eliminating noise & increasing performance & life
- Designed to exacting OEM specifications and tested for balance, ensuring safe operation
- Edge coded with the proper discard thickness which identifies when the rotor has reached the end of its useful life

PRIORITY1

- Factory Mill Balancing provides smooth rotor to pad contact and noise-free operation with improved pedal response
- Engineered with OEM style vane configurations that pull heat away from the inner wheel and caliper, speeding the cooling process for increased performance and life
- Premium anti-corrosive coating protects against corrosion and adds a superior look through today's open wheel vehicle designs
- Sold in pairs as weight permits

FLEETMETLOK®

- Built to withstand police & fleet severe duty performance demands with superior thermal stability and strength
- SurfaceLok™ coating is heat resistant and extends rotor life by limiting corrosion build-up
- Factory mill balanced
- OEM driven machining specifications allow smooth pad-to-rotor contact improving pedal response for safe driving in all conditions
- Enhanced rotor material
- Extended life, rust preventative rotor coating
